Forecast for Friday 07 Jun 2024

Weather: Variable cloud in the southeast of the Park during the early hours with some outbreaks of rain clearing away to leave a bright start across much of Snowdonia. By mid-morning, cloud increases from the northwest with a risk of some isolated light showers during the afternoon before becoming dry by the evening.

Chance of cloud-free hill tops above 800m: 40% becoming 70% then lowering to 40% again.

Low Cloud and visibility: Scattered cloud covering hills 500-600m at first, especially in the southeast with a brief improvement in the morning where cloud bases break up and lift above the highest summits, before filling and lowering again in the afternoon. Good to very good visibility lowering to moderate or poor in rain, showers and cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cool for the time of year, especially on summits where temperatures are exacerbated by strong winds.

Forecast for Saturday 08 Jun 2024

Weather: A band of heavy showers clears southeast at the start of the day followed by a good deal of sunny spells. Perhaps an isolated risk of a shower in the morning but becoming mostly dry by the afternoon. Feeling cold on summits but with high UV levels sun protection is advised.

Maximum wind: West-northwesterly winds 15-25mph gusts 25-35mph.

Chance of cloud-free hill tops above 800m: 30% in the morning becoming greater than 95%.

Low Cloud and visibility: Scattered to broken amounts of cloud 400-500m as a band of showers passes in the morning with visibilities falling to moderate or poor. Once cleared, cloud bases quickly lift and break with bases well above summits. Visibility improving to very good.

Temperature: **Valleys:** Plus 9 Celsius becoming Plus 13 Celsius.
At 800m: Plus 3 Celsius becoming Plus 6.
Freezing level: Just above highest summits.
